

it goes on to say here that water and air pollution caused by industrial or agricultural waste including generation of electricity. So it is all inclusive and not just a that is the thing that I wanted to nail down. Whether it is more than power districts. It is, and Senator Hasebroock was right to begin with. He told me it was.

PRESIDENT: Thank you, Senator Keyes for what purpose do you rise.

SENATOR KEYES: I would like to ask Senator Kremer a question.

PRESIDENT: Alright, does Senator Kremer yield?

SENATOR KEYES: Is this the same bill practically that we had either a year or two years ago that was killed?

SENATOR KREMER: Nearly as I can tell it is exactly the same kind of a bill.

SENATOR KEYES: Then this means that all the air cleaning equipment that is going in at Ashgrove Cement plant would be off of the tax rolls, the sale tax rolls.

SENATOR KREMER: They would be eligible for tax refund on the taxes that were applied to any material or supplies that they purchased for the building of facilities which control air pollution.

SENATOR KEYES: That would take care on anybody. If you go into my packing house and they are trying to control the pollution of the air, it would give them a refund on taxes.

SENATOR KREMER: I would have to study it more than I have now, but as I understand it would apply to the industry and to public utilities and to agricultural waste control. How much further than that it would go, I do not know, because I do not know what the amendment is.

SENATOR KEYES: All I have got to say is that if we do this, and open this keg of worms and let these industries and these business' get in and get refunds, you are going to have a refund on everything. Everything that you do, even a filter on a cigarette is cleaning up the air. I don't know what we have in mind, but I'll tell you this that is probably one of the worst things that has ever been brought before this legislature to try and pass. Now I was strictly against this bill the last time it came up and I hope that we just vote this thing down.

SENATOR KREMER: Only one point that needs to be made clear here. Senator Hasebroock, you may disagree with me, but I am sure that this applies only to the sales tax on the material that goes into these facilities and not on property tax, I am sure that is right.

PRESIDENT: Senator Burbach, did you wish to be recognized?

SENATOR BURBACH: Mr. President, members of the Legislature, I'm sorry I was at the telephone and distracted, but have we adopted the committee amendments?

PRESIDENT: All amendments have been adopted.
